## CAREER OBJECTIVE

A highly motivated and skilled React JS Developer aiming to utilize proficiency in MERN stack and cutting-edge technologies to create exceptional user experiences, enhance web application functionality, and drive business growth for a dynamic and forward-thinking organization.

## EXPERIENCE

- ❖ **Qwik IT** – Saint John, NB , Canada.

2023 - Present

**Front End Developer Intern** - remote

  - Actively developing and maintaining front-end applications using React and React Native at Qwikit, while continually honing my command of these popular JavaScript libraries for web and mobile development.
  - Collaborating closely with cross-functional teams to identify and address challenging front-end issues, fostering a collaborative problem-solving approach that consistently delivers timely and effective solutions.
  - Demonstrating a strong proficiency in React to design and maintain engaging and dynamic user interfaces for web applications at Qwikit, contributing to exceptional user experiences as an intern.

## SKILLS

- ❖ **EXPERTISE** : React.js | JavaScript | Tailwind | Html & Css | react-router | Daisy Ui | JWT | Git & Github
- ❖ **COMFORTABLE** : Express.js | Mongodb | Rest Api | axios | Material Ui | Firebase (Auth & Hosting) | Tanstack Query
- ❖ **FAMILIAR**: Node.js | Next.js| MySql | React Native | Redux | GraphQL | Socket io | Bitbucket | React Chart | Framer-Motion | Styled Components | Expo-cli
- ❖ **TOOLS** : npm | Chrome Dev Tool | Vs Code | Render | Dotenv | Canva | Vercel | Figma

INTERPERSONAL SKILL\_: Team Work | Honesty | Dedicated | Quick Learner | Communication

## PROJECTS

**Melodify Music Learning Platform** admin credentials: atmjobayer0@gmail.com , pass : PassWord@@@  
[Client Side Code](#) || [Server Side Code](#) || [Live Site](#)

- Developed and implemented a Music Learning Platform utilizing MERN stack, providing seamless interaction and learning opportunities for music.
- Designed and implemented user role management system using JWT, allowing flexible user authentication and authorization while ensuring the privacy and security of user data.
- Created intuitive dashboards for administrators, instructors and students, enabling efficient class management, enrollment and progress tracking, resulting in a personalized and engaging learning experience for users.
- Technologies:** react , node.js , express.js , stripe.js , firebase , mongoDB , tanstack query , react-chartjs-2, react-firebase-hooks, swiper, Material Ui, firebase, react-router

**DeviceZone – E commerce**  
[Client Side Code](#) || [Server Side Code](#) || [Live Site](#)

- Designed and launched a comprehensive e-commerce website specializing in electronic devices including smartphones, smartwatches, tablets, and laptops, offering a diverse range of products.
- Established a user-centric interface that ensures effortless inventory control, empowering users to effortlessly manage product listings through features like adding, removing, and updating items.
- Executed a reliable search mechanism, efficient sorting options, and seamless pagination functionalities, elevating the browsing journey for customers and enabling swift identification of preferred electronic devices based on their specifications.
- Technologies:** ReactJS, Redux , node.js , express.js , firebase , mongoDB , react-firebase-hooks , swiper , Styled Components

**Heaven – Online Toy Store**  
[Client Side Code](#) || [Server Side Code](#) || [Live Site](#)

- Developed and implemented a feature-rich online platform for purchasing toys, incorporating key functionalities such as product management, search, sorting, pagination and user friendly UI.
- Created an intuitive user interface allowing seamless inventory management enabling users to easily add, delete and update products.
- Implemented robust search, sorting and pagination features, enhancing the browsing experience and enabling users to quickly find desired toys based on their preferences.
- Technologies:** react , node.js , express.js , firebase , mongoDB , react-firebase-hooks , swiper, react-helmet-async, framer-motion

**Magnus- Employee Management System**  
[Client Side Code](#) || [Server Side Code](#) || [Live Site](#)

- Developed a cutting-edge Employee Management CRUD application using MERN (MongoDB, Express, React, Node.js) stack, showcasing my proficiency in full-stack development and ability to build robust, scalable, and user-friendly applications.
- Designed and implemented a highly intuitive and aesthetically pleasing user interface for the app, incorporating modern UI/UX best practices such as interactive checkboxes, dynamic input fields, tab navigation, and sleek pop-up dialogs, resulting in an enhanced user experience and increased productivity.
- Demonstrated exceptional problem-solving skills and attention to detail by successfully integrating various commonly used UI components, delivering a comprehensive and professional-looking web application, ultimately highlighting my commitment to delivering high-quality software solutions that exceed user expectations.
- Technologies:** React.js , node.js , express.js , mongoDB , Firebase , react-router

## EDUCATION

Diploma 01/2023-Present **Diploma in Computer Science**, Naogaon polytechnic institute | Naogaon , BD

## LANGUAGE

English(Comfortable) , Bangla(Native) , Hindi (Familiier)
